Service Development and Screening

The Northern Ireland Breast Screening Programme invites all women aged 50–70 every three years.

If you're over 70, you're still at risk of breast cancer and can make your own appointment through your local screening centre. Information to help you make an informed choice is available at www.cancerscreening.hscni.net or talk to your GP.

This poster promotes the Northern Ireland breast screening programme to women aged 50 to 70.
