FOOTNOTES:

The Stillbirth (Definition) Act 1992 redefined a stillbirth, from 1 October 1992, as a child which had issued forth from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life. Prior to 1 October 1992 the statistics related to events occurring after the 28th week of pregnancy.

Figures do not include births to women living outside Northern Ireland

Although data is available by single year for each Trust, it cannot be published due to small numbers

The Stillbirth (Definition) Act 1992 redefined a stillbirth, from 1 October 1992, as a child which had issued forth from its mother after the 24th week of pregnancy and which did not breathe or show any other sign of life. Prior to 1 October 1992 the statistics related to events occurring after the 28th week of pregnancy.

This data is sourced from the Child Health System and NI Maternity System. As a result, the data will differ from that published by NISRA which is shown in this report. NISRA presents births registered in a specific year, whereas CHS/NIMATS shows the number of births occurring in a specific year.

Potential Years of Life Lost (PYLL) is a measure of premature death, measured as the number of years of life 'lost' from a death when a person dies before the age of 75. A death at age 25, for example, has lost 50 potential years of life. Infant deaths under 1 years are omitted as they are mostly a result of causes specific to this age group and have different aetiologies to deaths later in life.

FOOTNOTES: Uptake rates for:
Diphtheria, Tetanus, Pertussis, Polio (IPV), and Hib (*Haemophilus influenzae* type b) refers to children who have received 3 doses (completed) before their first birthday.
In 2018-19, children born between 01/04/17- 31/03/18 received either the DTaP/IPV/Hib (5-in1) or the DTaP/IPV/Hib/HepB (6-in1) vaccination.
MenB (Meningococcal group B infection) refers to children who have received 2 doses (completed) before their first birthday. This vaccine was introduced in September 2015.
MenC (Meningococcal group C infection) refers to children who have completed their course before their first birthday. This vaccine ceased in June 2016.
Rotavirus refers to children who have received 2 doses before their first birthday (cannot be given to children 24 weeks or older). This vaccine was introduced in July 2013.
PCV (Pneumococcal Conjugate Vaccine) refers to children who have received 2 doses (completed) before their first birthday.
MenC/Hib refers to children who received one dose on or after their first birthday and before their second birthday.
MMR1 (Measles, Mumps and Rubella) by age 2 refers to children who received the first dose on or after their first birthday and before their second birthday.
MMR1 by age 5 refers to children who received the first dose on or after their first birthday and before their fifth birthday.
MMR2 by age 5 refers to children who received 2 doses on or after their first birthday and before their fifth birthday.
Pre school booster (DTaP/IPV) refers to children who received 4 doses of DTaP/IPV containing vaccines before their fifth birthday.
HPV (Human Papilloma Virus) refers to girls in Year 10 (aged 13-14 years) who have completed their course (3 doses from 2008-2013, 2 doses from September 2014).
School Leavers Booster (DT/IPV) refers to children who have received five doses of Diphtheria/Tetanus/Polio containing vaccine by end of Year 12.
Men ACWY (Meningococcal groups ACWY infections) refers to children who received one dose by end Year 12 (aged 15-16 years). This vaccine was introduced in August 2015.

Uptake of all vaccines to age of five years are presented by financial year April-March

*Uptake of schools based immunisations are presented by academic year - September-August - using Trust resident population (2009/10-2014/15).

All other schools based immunisations are presented by academic year - September-August - using school population.

FOOTNOTES: Uptake rates for:
Diphtheria, Tetanus, Pertussis, Polio (IPV), and Hib (*Haemophilus influenzae* type b) refers to children who have received 3 doses (completed) before their first birthday.
In 2018-19, children born between 01/04/17- 31/03/18 received either the DTaP/IPV/Hib (5-in1) or the DTaP/IPV/Hib/HepB (6-in1) vaccination.
MenB (Meningococcal group B infection) refers to children who have received 2 doses (completed) before their first birthday. This vaccine was introduced in September 2015.
Rotavirus refers to children who have received 2 doses before their first birthday (cannot be given to children 24 weeks or older). This vaccine was introduced in July 2013.
PCV (Pneumococcal Conjugate Vaccine) refers to children who have received 2 doses (completed) before their first birthday.
MenC/Hib refers to children who received one dose on or after their first birthday and before their second birthday.
MMR1 (Measles, Mumps and Rubella) by age 2 refers to children who received the first dose on or after their first birthday and before their second birthday.
MMR1 by age 5 refers to children who received the first dose on or after their first birthday and before their fifth birthday.
MMR2 by age 5 refers to children who received 2 doses on or after their first birthday and before their fifth birthday.
Pre school booster (DTaP/IPV) refers to children who received 4 doses of DTaP/IPV containing vaccines before their fifth birthday.
HPV (Human Papilloma Virus) refers to girls in Year 10 (aged 13-14 years) who have completed their course (3 doses from 2008-2013, 2 doses from September 2014).
School Leavers Booster (DT/IPV) refers to children who have received five doses of Diphtheria/Tetanus/Polio containing vaccine by end of Year 12.
Men ACWY (Meningococcal groups ACWY infections) refers to children who received one dose by end Year 12 (aged 15-16 years). This vaccine was introduced in August 2015.

Uptake of all vaccines to age of five years are presented by financial year April-March

Schools based immunisations are presented by academic year - September-August - using school population.

FOOTNOTES: Above figures are provisional and may be subject to change

Please note the method of calculating uptake is under development

Direct comparison cannot be made with data published for previous years

Participants are given a 6 months compliance period. Kits received after 6 months are not included in uptake

HSC Trust is allocated based on the postcode of the GP practice at which the person is registered

* Total includes people invited who did not have a GP attributed to their record, at time of reporting

People aged 60 to 74 years are invited every two years

The target is 55% uptake rate

Multicentre Study of Self-Harm in England <http://cebmh.warne.ox.ac.uk/csr/mcm/>

The National Registry of Deliberate Self Harm (National Suicide Research Foundation), Republic of Ireland <http://www.nsrf.ie/>

FOOTNOTES: The term 'self-harm' was derived from the term 'parasuicide'. The definition of 'parasuicide' was developed by the World Health Organisation (WHO)/ Euro Multicentre Study Working Group as: 'An act with non-fatal outcome in which an individual deliberately initiates a non-habitual behaviour, that without intervention from others will cause self-harm, or deliberately ingests a substance in excess of the prescribed or generally recognised therapeutic dosage, and which is aimed at realising changes that the person desires via the actual or expected physical consequences.'

"The following are considered to be self-harm cases:

- All methods of self-harm i.e. drug overdoses, alcohol overdoses, lacerations, attempted drownings, attempted hangings, gunshot wounds, etc. where it is clear that the self-harm was intentionally inflicted.
- All individuals who are alive on presentation to hospital following an act of self-harm."

Ideation cases involve presentations to the Emergency Department due to thoughts of self-harm and / or suicide where no act has taken place.

Data above is shown by Health Trust of residence and so will differ from figures published previously in Registry of Self-Harm Annual Reports

1 Data for individuals presenting with self-harm to ED: the individual figures for each Trust do not total the Northern Ireland figure. Individuals are counted once in the Northern Ireland total and once for each Trust in which they presented, however an individual may have presented in more than one Trust, but will be counted only once in the Northern Ireland total.
