

Do you have a child aged 6 months to 4 years in a clinical risk group?

They can now be vaccinated against COVID-19.

Eligible babies and children who are aged 6 months to 4 years should have their COVID-19 vaccinations.

Your specialist will know if they need to have the vaccine and provide a referral to your nearest vaccine clinic.

If you have any concerns speak to your child's GP or paediatrician.

For more information, see the leaflet at:
